

A complete site. One clear price.

REQUEST A QUOTE

Quote

An independent digital workshop in Fort Pierce, Florida. Practical websites, readable documents and useful data, with personal contact and one-time project prices.

Email first; phone/video conversations arranged privately. See your proposed website before payment.

WHY SO AFFORDABLE?

My repeatable build system and small-workshop approach help me work efficiently and keep overhead low. I explain the scope plainly: one creation fee for your tailored website and agreed technical/on-site SEO, with no required build-service subscription. Domain, hosting and third-party costs remain separate. SEO can improve organic visibility; paid ads do not buy organic ranking. You keep business information current and build genuine relationships, reviews and promotion. Indexing, rankings and traffic aren't guaranteed.

We build the vehicle for discovery; you drive the journey that gives it momentum.

DESIGN, COMPREHENSIVE SEO & A PRIVATE PREVIEW

Photos & graphics, included

Your photos, a simple gallery, and straightforward graphics created or assembled for the agreed design.

Phone, media & navigation

A readable phone and desktop layout, clear navigation, and appropriately prepared images and media.

Technical & on-site SEO

Comprehensive technical and on-site SEO tailored to the project: pages, images/alt text, links, metadata, crawl/index readiness and appropriate structured information.

Preview, handover & growth

Your working private preview before payment; included files, access and handover follow final written project terms.

See it together. Then make it yours.

01	02	03	04	05
Talk it through	See your own site	Decide & refine	Pay & receive	Choose delivery
Agree the goal, materials, scope, timing and one project price.	Your own working private website preview before payment.	Choose to proceed, with one consolidated revision round.	An agreed payment method; included files and handover follow written terms.	Files-only, or initial publication if ordered. You handle later hosting/publication.

Made with you: Bring your goals, approved words/images and preferences. Clear feedback and shared review points shape the result. Email comes first; calls/video are arranged privately.

Ongoing costs: Domain, hosting, renewals, and any third-party costs are disclosed and agreed upfront. No required monthly SEO retainer or maintenance subscription.

Useful function. One project price.

Choose by purpose, function and complexity. The 5/7/10-page allowances describe the package scopes. Every tier includes ordinary visuals, responsive design, agreed technical/on-site SEO and a private preview. Scope, delivery and total quote are agreed before work.

SCOPE 01 / QUOTE BY DISCUSSION

Quote

Community Start

A practical website for everyday business or community needs, with clear information and straightforward ways to reach you.

Purpose & function

Everyday business needs: clear services, work samples, and ways to contact you.

Page allowance

Up to 5 pages within the brief.

Overall scope

Ordinary website structure and behavior, agreed before work.

SCOPE 02 / QUOTE BY DISCUSSION

Quote

Business Plus

A richer business site with more connected content, useful visitor choices, and a more detailed presentation.

Purpose & function

Richer services, projects, collections, and guided visitor choices.

Page allowance

Up to 7 pages within the brief.

Overall scope

More connected content and detailed visitor flows, agreed together.

SCOPE 03 / QUOTE BY DISCUSSION

Quote

Interactive Showcase

A more detailed or interactive website with coordinated views and custom ways to explore your content.

Purpose & function

A more detailed, interactive experience with coordinated views and custom navigation.

Page allowance

Up to 10 pages within the brief.

Overall scope

Agree the finished experience; bespoke systems or intricate workflows need an overall quote.

Included in every tier: Photos, a simple gallery, straightforward graphics, comprehensive technical and on-site SEO tailored to the project, mobile/media optimization, a private preview, one revision round, and agreed handover.

Your part: Provide accurate business information and updates; earn and manage genuine reviews; handle public business listings, advertising, and outreach. We handle the website's optimization.

Built for growth: Organized site structure supports later pages, promotional landing pages, coupons, booking tools, or online selling. Future additions are quoted by total added scope and complexity.

Selected advertised examples, 18 Oct 2026: [WordPress.com Express](#): 5 pages, \$499 + required \$108/year plan. [Top Three](#), serving Fort Pierce: 3 pages, \$800. Different scopes and terms; not averages.

Useful files. Creative possibilities.

Documents, spreadsheets, publishing preparation and custom requests are individually scoped. The following catalog gives concrete deliverables and limits; prices for these services are confirmed after discussion.

Documents & content

Specification sheets, related batches, notices, reusable announcements, article preparation, reading indexes and polished brochures.

Spreadsheets & templates

One-sheet/CSV cleanup, duplicate flags and change logs, a manual job/payment tracker, and defined tracker personalization.

Website work

The three standard packages, existing-site updates, an agreed optimization review, or bespoke visual maps and interactive experiences.

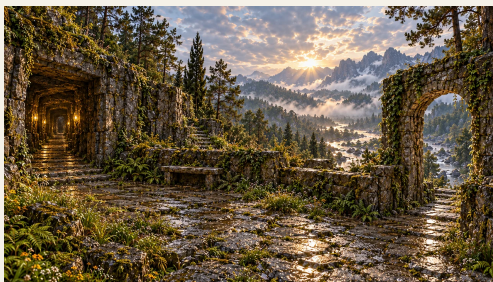

Special requests

Sourced comparison briefs, presentation cleanup, file organization/recovery, AI-assisted custom music and motion concepts - after scope and sample checks.

Each task starts with: the source files, audience, desired result, limits, timing, review point and one agreed price. Some production is AI-assisted with source checks. Tell me about tool or confidentiality restrictions before sharing files. Official certification/professional sign-off is separate.

Delivery choice: Choose build-and-deliver/client publishes, or initial publication only if expressly ordered. Receive the agreed files by download/share-link ZIP, email if size permits, or optional thumb drive by agreement. Delivery and total price are agreed before work.

Files, rights & hosting: Confirm included files, dependencies, permitted uses and any hosting or third-party charges before work. After handover, setup, migration, DNS/service reconnection, training, maintenance, support and later edits are not included; later work requires a new scope.

[EXPLORE MY BESPOKE RESEARCH WEBSITE](#)

Protopomorphogenia

A bespoke, unusually ornate research project with connected reading, interactive visualizations and a navigable world. Its full experience is beyond the standard tiers. Explore, enjoy, and discuss a separately scoped idea.

protopomorphogenia.com

Beyond the standard tiers: Connected reading, dimensional maps, navigable custom scenes, art and media controls. A similarly ornate project needs a working sample and custom quote. Narration production is still in development; music rights are checked per track.

Make supplied material easier to use.

Source-aware preparation, readable layouts and reusable text. The examples are fictional demonstrations and personal project work, not paid-client outcomes.

Specification or short-document formatting

QUOTE AFTER DISCUSSION

One editable source document, up to 3 source pages. One PDF and a concise source-issues note. One consolidated correction round within the brief.

Boundaries: You approve technical facts and values. OCR, source reconstruction, complex diagrams and certification are outside this starting scope. Editable output is included only if agreed.

Related specification-sheet batch

QUOTE AFTER DISCUSSION

Up to 3 related editable documents / 9 source pages. Up to 3 PDFs and a source-issues list. One correction round within the agreed batch.

Boundaries: Missing or conflicting facts are flagged rather than invented. Technical approval, OCR, complex diagram reconstruction and certification are excluded.

Notices, announcements & reusable text

QUOTE AFTER DISCUSSION

A short notice or one-page PDF. A shorter announcement and a practical checklist. Source-fact comparison and open questions.

Boundaries: Agree audience and amount first. Posting, campaign management, reach and response are separate from preparing the files.

Article & reading preparation

QUOTE AFTER DISCUSSION

A ready-to-review article body with headings. Descriptive links and a clear reading sequence. An issues/checklist note for owner review.

Boundaries: Agree length and editing depth. Source meaning and facts remain for your approval; publication and account access need separate authorization.

Reading indexes & linked collections

QUOTE AFTER DISCUSSION

One reading index or linked contents page. Descriptive labels and ordered links. A list of missing or unresolved destinations.

Boundaries: Provide approved texts or URLs. Scope a larger archive separately; no change to source masters or accounts is implied.

Brochures & polished PDF layouts

QUOTE AFTER DISCUSSION

An agreed page layout with headings and simple tables. A print/share PDF and layout review. Editable production source if agreed.

Boundaries: Agree text, images, page count and revisions. Writing from scratch, specialist certification and complex print production are separate scopes.

Practical data. Useful improvements.

Agree the input, result and change rules before work. Original files are preserved. The website build packages are on page 2; these are other separately scoped requests.

Spreadsheet & CSV cleanup

QUOTE AFTER DISCUSSION

One sheet or CSV, up to 250 rows and 10 columns. Cleaned copy, duplicate flags and change log. Original preserved; one correction round.

Boundaries: A clear duplicate rule is required before deleting anything. Formula repair, source merges, web research and regulated sensitive records are outside this scope.

Manual job & payment tracker

QUOTE AFTER DISCUSSION

Existing XLSX template with 200 blank job rows. Fictional examples and a use guide. Discuss format suitability and delivery first.

Boundaries: No bank feeds, macros, automatic invoicing, tax calculation or financial advice. Native Excel/Sheets compatibility and the delivery route must be checked for your use.

Tracker personalization & simple workflows

QUOTE AFTER DISCUSSION

An agreed set of fields, labels or layout changes. Affected calculation checks and a short guide. One agreed correction round.

Boundaries: File review and feasibility come first. Integrations, migration and unlimited changes are excluded; unsupported functionality needs its own demonstration.

Existing website updates

QUOTE AFTER DISCUSSION

Platform/access review and an approved backup or editable copy. One defined update batch with a preview. Delivery of the agreed changed files.

Boundaries: New systems, publication and unfamiliar platforms need an explicit scope. After delivery, you handle publication and later changes. No ongoing maintenance or support is included.

Site structure & optimization review

QUOTE AFTER DISCUSSION

Scope-led page, image, link and metadata review. Crawl/indexing-readiness findings where access permits. Prioritized fixes or a separately agreed improvement batch.

Boundaries: New website tiers already include suitable optimization. An existing-site review is separately scoped; indexing, ranking, traffic and paid marketing are not promised.

Custom maps & interactive experiences

QUOTE AFTER DISCUSSION

An agreed concept and working sample. Defined views, controls and ordinary text navigation. One overall quote based on the finished experience.

Boundaries: The ornate research project is beyond standard package scope. Stores, bookings, accounts, intricate workflows and external systems are checked before a price is promised.

Discuss the idea before the quote.

Special requests require a suitability, sample or rights check before acceptance. Each project has an agreed scope and quote before commitment.

Presentation cleanup requests

QUOTE AFTER DISCUSSION

A proposed slide scope and a suitability check. A sample before committing to an unfamiliar format. Agreed deck/PDF outputs if the workflow is suitable.

Boundaries: Native slide delivery is not represented as an established ready-to-order package. A demonstration and full render are required before accepting that scope.

Sourced comparisons & concise briefs

QUOTE AFTER DISCUSSION

An agreed question and source boundary. A concise cited comparison or summary. Dates, uncertainties and a source list.

Boundaries: Agree sources and depth first. No legal, medical, financial or other professional advice or exhaustive-research guarantee.

File organization & format-recovery requests

QUOTE AFTER DISCUSSION

A proposed folder/index or format plan. A preservation copy and a small trial. Agreed outputs and a limitations note.

Boundaries: Feasibility is checked before accepting work. Broad recovery, damaged files, OCR, private archives and unfamiliar formats are not automatic package inclusions.

AI-assisted custom music & website audio

QUOTE AFTER DISCUSSION

Agree mood, duration, use, sample and revisions. Check track-specific creation and permitted-download rights. Scope a player separately from producing a new recording.

Boundaries: Commercial use is conditional on applicable Suno terms and the track's rights. No exclusive copyright or universal royalty-free promise. Narration production is still in development.

Animation & visual storytelling requests

QUOTE AFTER DISCUSSION

Agree the scene, elements and movements. Review a sample, duration and still alternative. One overall scoped quote.

Boundaries: No blanket claim of finished music/video/animation packages. Rights, suitability and a working sample are agreed first.

Before we agree

Share goals, audience, materials, approximate size and timing. Request a phone/video discussion through the inquiry route.

Each commissioned site is tailored. Reliable technical components may be reused; your content and assets are not reused for other customers.

Use the existing public contact route. Project fees are separate from voluntary research contributions.
